AUDIT REPORT

Operational Audit

Operations & Service Quality Assessment

Client (fictional)	Brew & Bowl Café (fictional network)
Location	Westfield Chermside, QLD
Audit type	Operational Audit
Audit conducted	2 July 2026
Report issued	4 July 2026 (48-hour turnaround)
Lead auditor	S. Okafor, Operations Auditor — Maintain Audits
Report reference	MA-2026-OP-0231
Distribution	Franchisor head office; franchisee principal — Commercial in confidence

SAMPLE DOCUMENT — all client details and findings are fictional, prepared to demonstrate Maintain Audits' reporting format.

SECTION 1 | EXECUTIVE SUMMARY

Brew & Bowl Chermside was audited against the network operational standard across five domains: food safety, staffing, cash handling, compliance documentation, and service quality. The site scored 74% against a target of 85%, earning a High rating, with six findings raised.

The most pressing finding is a cool-room temperature log that has not been completed for eleven consecutive days — a food safety gap with direct regulatory and brand risk. Beyond that, the pattern here is a site under staffing pressure: the kitchen was operating with two fewer staff than the network minimum at audit time, and a number of the other findings trace back to shortcuts taken under that pressure.

The team's front-of-house culture is genuinely strong and the franchisee was engaged and transparent throughout the audit. Closing the six findings will bring the site back above the network target.

Overall Result

Measure	Result
Overall compliance score	74% (target ≥ 85%)
Overall rating	High
Findings raised	6
Most urgent action due	Cool-room temperature log (OP-01) — within 48 hours

Findings by Risk Rating

Rating	Count
Critical	1
High	2
Medium	2
Observation	1

SECTION 2 | SCOPE & METHODOLOGY

A full operational audit against the Brew & Bowl Network Operations Manual v7, covering all areas a customer, regulator, or franchisor would reasonably assess.

In Scope

- Food safety — temperature records, storage, allergen management, hygiene
- Staffing — levels, certification, scheduling against the network minimum
- Cash handling — till reconciliation, discount procedures, safe compliance
- Compliance documentation — licensing, certificates, registers
- Service quality — order accuracy, speed of service, presentation standards

How the Audit Was Conducted

- Unannounced full-day site audit using the 96-point operational checklist
- Temperature log review (cool room, hot hold, and display fridge) for the preceding 30 days
- Staffing roster and certification review
- Mystery order placed to assess service quality and order accuracy
- Debrief with franchisee and shift manager at close of audit

Risk Rating Scale

Rating	Meaning	Action required
Critical	Immediate threat to safety, legal compliance, or brand integrity.	Within 48 hours
High	Material non-compliance likely to cause customer, safety, or financial impact.	Within 7 days
Medium	Non-compliance with franchise standards; manageable if addressed promptly.	Within 30 days
Low	Minor deviation or housekeeping issue.	Within 90 days
Observation	Not a non-compliance; an improvement opportunity worth acting on.	At next review

SECTION 3 | FINDINGS SUMMARY

ID	Area	Finding	Rating
OP-01	Food safety	Cool-room temperature log not completed for 11 days	Critical
OP-02	Staffing	Kitchen operating below network minimum staffing level	High
OP-03	Cash handling	Manager discount PIN shared among front-of-house team	High
OP-04	Compliance docs	No waste recording for preceding 30 days	Medium
OP-05	Compliance docs	Weekly cleaning schedule signed off in advance — not completed	Medium
OP-06	Compliance docs	No accredited Food Safety Supervisor currently on staff	Observation

SECTION 4 | DETAILED FINDINGS
CRITICAL
OP-01 — Cool-room temperature log not completed for 11 days

Rating	Area	Standard / reference	Remediate by
Critical	Food safety	Network Ops Manual s.4.2; Food Act obligations	Within 48 hours

What we found: The cool-room manual temperature log (Form OPS-04) had not been completed since 22 June 2026 — eleven days. The unit was operating within range at time of audit, but the absence of records removes the ability to demonstrate compliance over that period.

Evidence: Log book reviewed on site; photos 012-014.

Recommended action: Recommence daily logging immediately. Review the cool-room temperature data logger (installed but not being checked) and integrate it into the opening-checklist verification so a single person is responsible each day.

Responsible: Franchisee / shift manager

HIGH
OP-02 — Kitchen operating below network minimum staffing level

Rating	Area	Standard / reference	Remediate by
High	Staffing	Network Ops Manual s.2.1	Within 7 days

What we found: At audit commencement (11:30am, pre-lunch peak), the kitchen had two staff on floor against a network minimum of four for this trading window. A third was due at 12:00 but not confirmed. The franchisee acknowledged this is a recurring pattern on weekday mornings due to difficulty filling casual shifts.

Evidence: Roster reviewed; staff observed on floor at audit time.

Recommended action: Address the structural staffing gap — either through additional casual recruitment or revised shift design. Submit a staffing plan to the support office within 7 days.

Responsible: Franchisee

HIGH
OP-03 — Manager discount PIN shared among front-of-house team

Rating	Area	Standard / reference	Remediate by
High	Cash handling	Network Ops Manual s.6.4	Within 7 days

What we found: The POS manager discount function (which applies discounts up to 30%) is accessed via a shared PIN known to at least three front-of-house team members. This removes the ability to attribute discounts to an authorised user and creates material cash-handling risk.

Evidence: POS configuration confirmed by shift manager; discount report reviewed — 14 manager discounts applied across 3 shifts in the preceding week.

Recommended action: Reset the PIN immediately, restrict access to the franchisee and nominated manager only, and assign individual user logins to all staff. Review the preceding 30 days' discount report for anomalies.

Responsible: Franchisee

MEDIUM
OP-04 — No waste recording for preceding 30 days

Rating	Area	Standard / reference	Remediate by
Medium	Compliance docs	Network Ops Manual s.4.8	Within 30 days

What we found: The daily waste log (Form OPS-07) has not been completed for the preceding 30 days. Waste recording is required both under the Operations Manual and as a control against unrecorded product removal.

Evidence: Log book reviewed; last entry dated 1 June 2026.

Recommended action: Recommence waste recording and add to the end-of-day closing checklist. The franchisee confirmed the log exists — it simply fell out of routine during a period of staffing change.

Responsible: Franchisee / shift manager

MEDIUM
OP-05 — Weekly cleaning schedule signed off in advance — not completed

Rating	Area	Standard / reference	Remediate by
Medium	Compliance docs	Network Ops Manual s.5.2	Within 30 days

What we found: The weekly deep-cleaning schedule had four of seven days pre-signed. Physical inspection of the identified areas confirmed two had not been completed as indicated (grease trap surround; exhaust canopy baffle).

Evidence: Cleaning schedule reviewed; photos 031-035 (grease trap surround); photos 038-040 (canopy baffle).

Recommended action: Reinforce that cleaning logs must be completed at the time of the task. Address the pre-signing as a conduct matter with the relevant staff member. Complete the two outstanding cleaning tasks within 48 hours.

Responsible: Franchisee / shift manager

OBSERVATION
OP-06 — No accredited Food Safety Supervisor currently on staff

Rating	Area	Standard / reference	Remediate by
Observation	Compliance docs	Network Ops Manual s.3.1; QLD food reg.	At next review

What we found: The previous FSS certificate holder resigned in May 2026. No current staff member holds the qualification. This is an observation rather than a finding because the Chermside site currently holds a valid certificate through a neighbouring company entity — however, it is not best practice and creates a gap if that arrangement changes.

Evidence: Staff record review; FSS register checked against current staff list.

Recommended action: Enrol a nominated staff member in the next available FSS accreditation course. The franchisee agreed to action this at the next review.

Responsible: Franchisee

SECTION 5 | WHAT'S WORKING WELL

An audit should recognise strength as clearly as it flags risk. The following practices met or exceeded the network standard:

- Front-of-house culture is a clear strength — the team was engaged, friendly, and clearly proud of the site
- Order accuracy rate was 100% across three mystery orders placed during the audit
- Coffee quality and consistency scored in the network's top quartile
- Front-of-house presentation and cleanliness met the network standard throughout

SECTION 6 | REMEDIATION ROADMAP

Actions are sequenced by risk. Maintain Audits can verify closure of each item through a follow-up desktop review or re-inspection.

ID	Action	Owner	Due
OP-01	Recommence cool-room temperature log; integrate into opening checklist	Franchisee / shift manager	Within 48 hours
OP-02	Submit staffing plan to support office	Franchisee	Within 7 days
OP-03	Reset manager discount PIN; assign individual POS logins; review discount history	Franchisee	Within 7 days
OP-04	Recommence waste recording; add to closing checklist	Franchisee / shift manager	Within 30 days
OP-05	Address pre-signing; complete outstanding cleaning tasks	Franchisee / shift manager	Within 30 days
OP-06	Enrol staff member in FSS accreditation	Franchisee	At next review

SECTION 7 | NEXT STEPS & ONGOING MONITORING

- Evidence of OP-01 correction (photo of completed log) to Maintain Audits within 48 hours
- Staffing plan and OP-03 correction evidence within 7 days — desktop review at no charge
- Recommend a follow-up operational audit in 60 days to re-score against the network standard
